

Gaspare Tocci

Profile

I am a motivated individual with a diverse background in hospitality, security, and volunteer military service. My experience has honed my adaptability, determination, and commitment to excellence. Passionate about continuous learning, I have pursued technical certifications and developed strong IT fundamentals. I am now eager to bring my creativity and skills to a web development/design apprenticeship, where I aim to drive innovation and deliver impactful solutions.

GetSetUK Web Development Trainee

Currently enrolled in an intensive web development program focused on both practical application and theoretical understanding of web technologies. Strengthening proficiency in HTML, CSS, and JavaScript.

Designed responsive websites with a mobile-first approach, ensuring optimal functionality across various devices and screen sizes.

Utilized UX/UI design principles to craft intuitive and user-centric web interfaces, enhancing overall usability.

Developed adept debugging skills and a robust problem-solving mindset through hands-on challenges.

Implemented modern web development strategies, including SEO techniques, to elevate website visibility and performance.

Committed to continuous learning, actively keeping pace with evolving web development trends and technologies.

Work Experience

(2009-2022): Hospitality and Security Roles

During this period, while working in the hospitality sector across Italy and London, I demonstrated strong attention to detail and customer service skills as a waiter in upscale establishments. Additionally, I developed proficiency in CCTV monitoring and perimeter control through my unarmed security duties at Marina4 - Darsena, Caorle Porto Santa Margherita, Italy. Within hospitality, I assumed leadership roles, managing a small team.

(2004-2005): Military Experience

My time as a volunteer soldier at Ettore Manes Barracks of the Genius Sapper was instrumental in acquiring technical skills in surveillance systems and resource management. As a corporal, I showcased adaptability and problem-solving abilities while managing various tasks and responsibilities.

About Me

"I'm a relentless perfectionist. When I create something, achieving excellence isn't the end—it's just the beginning. I'm always envisioning ways to elevate my work and exploring different scenarios. Beyond my professional pursuits in web development, I'm fueled by passions like gaming, chess, and hitting the gym."
