Gaspare Tocci

Junior Web Developer | CMS & Dynamic Websites | Front-End Development
London, UK · +44 07833 278900 · gaspare_tocci@yahoo.it
Portfolio · GitHub · LinkedIn

PERSONAL PROFILE

Junior Web Developer with hands-on experience building CMS-driven Wix websites for an international health NGO, including 12 dynamic pages over a ~600-record database with live search, filters and JavaScript (Velo) enhancements. Strong in responsive design, CMS data structure, troubleshooting and clear documentation, and quick to learn new platforms. Keen to bring this experience to WordPress/Elementor and collaborative social-impact projects.

KEY SKILLS

Web Development: HTML5, CSS3, JavaScript (ES6+), Wix Velo, Front-End Development, Responsive Web Design, Cross-Browser Testing, Debugging & Troubleshooting

CMS & Website Management: Wix CMS, Dynamic Pages, Referenced Collections & Repeaters, CMS Data Modelling, CSV Data Cleaning & Import, Website Administration & Maintenance

UI/UX & Accessibility: Figma (prototyping), UI/UX Fundamentals, Responsive Layouts, Visual Hierarchy, Accessibility Fundamentals / WCAG Awareness

Development Tools: Git, GitHub, VS Code, Browser DevTools

Design & Digital Content: GIMP, Inkscape, Canva, Blender, Filmora, OBS Studio

Soft Skills: Problem Solving · Attention to Detail · Reliability · Adaptability · Clear Written Reporting · Stakeholder Collaboration

EMPLOYMENT HISTORY

Web Developer & Web Services Administrator (Volunteer, part-time) Jul 2026 – Present
Infectious Disease Alliance (IDA), global health NGO · Remote

- Rebuilt IDA's committee section in Wix as a CMS-driven system: 12 dynamic committee pages fed by a ~600-member database through referenced collections, with real-time name search, committee filters, member carousels and CMS-driven Previous/Next navigation.
- Cleaned and standardised committee member data (job titles, organisations, photos, LinkedIn profiles); added organisation logo and website fields; set incomplete profiles to hidden until verified and produced a missing-data report for the communications team.
- Rebuilt live pages including Our Team (15 department sections, in-page menu, live search), Alumni (new CMS collection), Events and Careers (live job search and work-location filter), optimised for desktop and mobile.
- Diagnosed a homepage mobile display failure caused by a legacy Velo script and resolved it while preserving the code for future reuse; consolidated and documented page JavaScript, using it only where native Wix features fell short.
- Created 25+ page structures for the website redesign (events, resources, careers, donate and more) as mobile-ready wireframes awaiting final content.
- Restyled the live homepage and footer for consistency and readability; standardised card designs across Team, Committee and Alumni sections.
- Supported IDA's Global Health Finance Coalition website (header 'Join the Coalition' button linked to the membership form, logo display fixes, footer updates) and cleaned up organisation-wide email signatures.
- Coordinated with communications, HR, design and leadership; published written updates after each working session and proposed improvements including Figma for shared design and a CMS clean-up.

Professional Development Jan 2022 – Jun 2026
Self-directed training and projects

- Undertook continuous technical training, online learning and practical projects in web development and digital technologies.
- Developed and maintained a professional portfolio showcasing web development and digital projects.

Hospitality & Security Roles 2009 – 2022
Italy and London

- Delivered customer service and supported day-to-day operations across hospitality and security environments.
- Monitored CCTV systems, conducted security patrols and maintained accurate operational records.
- Managed teams, trained new staff and coordinated activities in fast-paced environments.

Military Service — Corporal, Engineer Corps (Sapper) 2004 – 2005

Ettore Manes Barracks, Italy

- Responsible for fuel depot operations and resource management, including on-call, out-of-hours operational support.
- Operated and maintained surveillance systems, supported logistics, and led small teams in high-pressure environments.

TRAINING & EDUCATION
